

Michael Anthony Gates

Software Engineer · Unreal Engine & Game Development

Tokyo, Japan · 080-2239-9178 · michaelgatesdev@gmail.com · michaelgates.dev · linkedin.com/in/michaelgatesdev
Visa: Engineer / Specialist in Humanities / International Services (work-authorized in Japan)

SUMMARY

Tokyo-based software engineer specializing in Unreal Engine and game technology. Builds Unreal Engine 5 frameworks and online game services for Nintendo Switch 2, PlayStation 5, and PC, from platform service integration (PlayStation Network, Steam) to console debugging. Draws on 6+ years of software engineering across backend, web, and mobile, including team and engineering lead roles. Works in English and Japanese (JLPT N2).

SKILLS

Game Development	Blender, Unity, Unreal Engine 5 (C++, plugin development)
Platforms	Nintendo Switch 2, PC, PlayStation 5, PlayStation Network, Steam
Languages	C#, C++, Java, Kotlin, PHP, Python, Rust, TypeScript
Backend & Web	Django, GraphQL, React, React Native (Expo), Spring Boot, Vite
Tools	CI/CD, Confluence, Git, Jest, Jira, JUnit, Redmine, SonarQube, YouTrack
AI	Claude, Codex
Spoken	English (Native), Japanese (Professional, JLPT N2)

EXPERIENCE

SOFT GEAR Co., Ltd.
Software Engineer

Tokyo, Japan (Hybrid)
Jun 2024 – Present

- Developed a reusable game framework as an Unreal Engine 5 plugin supporting Nintendo Switch 2, PlayStation 5, and PC
- Integrated platform online services, including PlayStation Network and Steam, into the framework
- Troubleshoot and debugged platform-specific issues on Nintendo Switch 2 and PlayStation 5
- Built an Unreal Engine test client for testing game features and backend services
- Designed and built game servers and backend services, including RESTful APIs, with Kotlin and Spring Boot
- Wrote and maintained unit and integration tests for clients and servers
- Wrote and translated technical documentation between English and Japanese in Confluence

Technergetics, LLC
Associate Full Stack Software Engineer

Utica, NY
May 2022 – Sep 2023

- Served as team lead and engineering lead across multiple projects
- Developed cross-platform iOS and Android apps with React Native (Expo) and native Kotlin
- Implemented CI/CD pipelines for unit testing (Jest, JUnit) and static code analysis (SonarQube)

Junior Full Stack Software Engineer

Jul 2020 – May 2022

- Developed backend and frontend features for a large-scale Django web application
- Led development of key new features and presented them to stakeholders
- Helped the project achieve CTF certification by raising test coverage above 80% and remediating CVEs

Super Eight Festivals
Full Stack Developer

Plattsburgh, NY
Oct 2019 – Aug 2022

- Owned end-to-end development of an Omeka-based PHP website, from design through testing and deployment
- Designed custom themes and wrote a custom plugin extending Omeka's core functionality

PROJECTS

reSide — Fan remake of the social MMO vSide, including the game client and website ·
youtu.be/B6eXKCLvZ2c

Unreal Engine 5, Blender

EDUCATION

State University of New York College at Plattsburgh
B.S. in Information Technology

Plattsburgh, NY
Aug 2016 – May 2020

Outstanding Graduate in Information Technology · Presidential Award for Student Excellence · Student Staff Award

The Naganuma School (Tokyo School of Japanese Language)
Japanese Language Program

Tokyo, Japan
Oct 2023 – Jun 2024
